ARDUINO HACKATHON

INTRODUCTION:

Arduino Hackathon is a competition in which your problem solving skills and coding skills will be tested on Arduino in TinkerCAD.

DESCRIPTION:

A real-life problem will be given to you. You are expected to design and simulate a circuit with Arduino in TinkerCAD to solve the problem statement and submit it within the time limit.

RULES:

There will be 2 rounds. Participants will have to create and simulate an Arduino circuit in TinkerCAD that could solve the given problem within the time limit. Marks will be awarded based on the extent of solving the problem statement and the time taken to create and submit the circuit. Marks obtained for both rounds will be summed at the end.

Qualifier:

→ Maximum time limit: 60 minutes

→ Maximum points 40

Finals:

→ Maximum time limit: 90 minutes

→ Maximum points 60

JUDGING CRITERIA AND MARKING SCHEME:

Points will be awarded based on the time taken and the extent to which the problem is solved. Time taken will be a major factor as the problem statement will be relatively easy to solve.

WISSENAIRE

SUBMISSION FORMAT:

- 1) A short video (max. 30 seconds) of the simulation of the circuit designed must be made. (Video should be recorded by any screen recording software and not by the mobile camera)
- 2) Screenshot of the circuit. (image in any format)
- 3) Upload the code as a text (.txt) file.
- 4) Share the link of the TinkerCAD file in a text (.txt) file.

For the TinkerCAD link, you may refer to “ <https://www.youtube.com/watch?v=LiRCd59iJtw> ” Remember not to share your TinkerCAD file link with others as the circuit can be modified by anyone with the link and we won't be responsible if the screenshot of the circuit doesn't match with the circuit. Zip above 4 files, name zip file as “YourFullName_ParticipationNumber” Send the Zip file via Google form provided at the start of the competition.
